Contents of Volume 36

Number 1 – January 1991

Research Papers

Automated image analysis for counting unstained cultured neurones
J.D. Clements and J.M. Buzy (U.S.A.) 1

A fluorescent labeling strategy for staining the enteric nervous system
T.L. Powley and H.-R. Berthoud (U.S.A.) 9

A method using DiI to study the connectivity of cortical transplants
M. Heredia, M. Santacana and F. Valverde (Spain) 17

GABA release from mouse striatal neurons in primary culture as a test for the functional activity of *N*-methyl-D-aspartate (NMDA) antagonists
A. Jouanen, A.-M. Tremblet, D. Massardier, J.-L. Haesslein and P.F. Hunt (France) 27

Computer aided tracing and encoding of axonal arborizations
G.M. Ratto and C. Usai (Italy) 33

A microcomputer-controlled system for use in auditory physiology
Z.M. Fuzessery, R.G. Gumtow and R. Lane (U.S.A.) 45

Autoradiography with saturation experiments of ^{11}C-Ro 15-1788 binding to human brain sections
A. Persson, R. D'Argy, P.-G. Gillberg, C. Halldin, J.-E. Litton, C.-G. Swahn and G. Sedvall (Sweden) 53

Intracellular recording from respiratory neurones in the perfused 'in situ' rat brain
F. Hayashi, C. Jiang and J. Lipski (New Zealand) 63

An ELISA assay for GAP-43
W.S. Chang, C. Hollberg Friedman, M.A. Iqbal and N.T. Neff (U.S.A.) 71

Adaptation of the Reitboeck method of multiple microelectrode recording to the neocortex of the waking monkey
V.B. Mountcastle, H.J. Reitboeck, G.F. Poggio and M.A. Steinmetz (U.S.A.) 77

In vitro microdialysis: a novel technique for stimulated neurotransmitter release measurements
C.W. Bradberry, J.S. Sprouse, P.W. Sheldon, G.K. Aghajanian and R.H. Roth (U.S.A.) 85

A system, using neural cell lines, to characterize HSV-1 vectors containing genes which affect neuronal physiology, or neuronal promoters
A.I. Geller (U.S.A.) 91

A parallelizing algorithm for computing solutions to arbitrarily branched cable neuron models
M. Mascagni (U.S.A.) 105

Book reviews 115

Announcements 117

Number 2, 3 – February 1991

Research papers

Co-localization of proenkephalin mRNA using cRNA probes and a cell-type-specific immunocytochemical marker for intact astrocytes in vitro
A. Stiene-Martin, J.G. Osborne and K.F. Hauser (U.S.A.) 119

A tandem-lens epifluorescence macroscope: hundred-fold brightness advantage for wide-field imaging
E.H. Ratzlaff and A. Grinvald (U.S.A.) 127

A new rapid silver impregnation for neuronal bodies on methacrylate sections
D. Tolivia and J. Tolivia (Spain) 139

Analysis of laminar distribution of kappa opiate receptor in human cortex: comparison between schizophrenia and normal
M.C. Royston, P. Slater, M.D.C. Simpson and J.F.W. Deakin (U.K.) 145

A note on the use of biocytin in anterograde tracing studies in the central nervous system: application at both light and electron microscopic level
P.N. Izzo (U.K.) 155

The influence of assay conditions on measurement of excitatory dibasic sulphinic and sulphonic alpha-amino acids in nervous tissue
S.J. Waller, I.C. Kilpatrick, M.W.J. Chan and R.H. Evans (U.K.) 167
An integrated multielectrode electrophysiology system
A. Borroni, F.-M. Chen, N. LeCursi, L.M. Grover and T.J. Teyler (U.S.A.) 177
Dual fluorescence combined with a two-color immunoperoxidase technique: a new way of visualizing diverse neuronal elements
P.M. Pilowsky, J. Lipski, R. Prestidge and C. Jiang (New Zealand) 185
Thin slices of teleost retina continue to grow in culture
A.F. Mack and R.D. Fernald (U.S.A.) 195
Determination of the membrane-buffer partition coefficient of flunitrazepam, a lipophilic drug
M.A. Perillo and A. Arce (Argentina) 203
Pharmacological evidence, using in vivo dialysis, that substances additional to ascorbic acid, uric acid and homovanillic acid contribute to the voltammetric signals obtained in unrestrained rats from chronically implanted carbon paste electrodes
M.H. Joseph and A.M.J. Young (U.K.) 209
The "staircase test": a measure of independent forelimb reaching and grasping abilities in rats
C.P. Montoya, L.J. Campbell-Hope, K.D. Pemberton and S.B. Dunnett (U.K.) 219
Long-term tracing of vital neurons with Hoechst 33342 in transplantation studies
U. Sprick (F.R.G.) 229
Active microwave computed brain tomography: the response to a challenge
H. Almirall, A. Broquetas and L. Jofre (Spain) 239
High time resolution fluorescence imaging with a CCD camera
N. Lasser-Ross, H. Miyakawa, V. Lev-Ram, S.R. Young and W.N. Ross (U.S.A.) 253
A simple method for reducing autotomy in rats after peripheral nerve lesions
R.E. Sporel-Özakat, P.M. Edwards, K.T. Hepgul, A. Savas and W.H. Gispen (Turkey, The Netherlands) 263
